### Better Than Spanking.

Spanking will not cure children of wetting the bed, because it is not a habit but a dangerous disease. The C. H. Rowan Drug Co., Dept. B1158 Chicago, Ill., have discovered a strictly harmless remedy for this distressing disease and to make known its merits they will send a 50c. package securely wrapped and prepaid. Absolutely Free to any reader of the Current. This remedy also cures frequent desire to urinate and inability to control urine during the night or day in old or young. The C. H. Rowan Drug Co. is an old Reliable House, write them, today for the free medicine. Cure the afflicted members of your family, then tell your neighbors and friends about this remedy.

### Oculist and Manufac- turing Optician

I have had thirty years experience in the examination of eyes and the fitting of glasses. No charge for examination. I grind my own lenses, therefore can duplicate any lens upon the shortest notice. Bring your broken glasses to me and I can duplicate the lenses while you wait.

Medal to Policeman as Chicago's Bravest: Caught Negro Slayer.

Chicago, August 14.—Patrolman J. A. McBurnett was officially declared the hero of the year today when the civil service commission awarded him the Harrison and Tree medal for 1912. This is the highest honor that can be given to a policeman by the city.

McBurnett arrested a negro murderer, who had crawled beneath a house and threatened to shoot anyone who came after him. The policeman pried off some boards at the bottom of the building and squeezed his way in the darkness to where the negro lay. As he advanced the negro twice pulled the trigger of the revolver, but the cartridge failed to explode, the mechanism of the weapon having become clogged by dirt.

For almost a week the commission listened to tales of the heroism of the policeman, and decided that McBurnett's act was the bravest of the year.

Ed Wilson completed plans this week for a fine \$3,000 residence for Sam Jones on Rocky. Mr. Wilson will commence construction at once.

## THE CITY BEAUTIFUL

### GRASS WALKS AND STEPS ADD TO ANY CITY OR PARK

Sloping Ground Terraces Necessary  
For the Best Results.

Many gardens in England owe their beauty in no small measure to the velvety grass steps and walks that link together one feature of the garden with another. Grass walks are pleasant to walk upon and are pleasing to the eye. Moreover they enter into perfect har-

GRASS STEPS IN ENGLAND.

mony with the surroundings, whether it be trees, shrubs or herbaceous flowers.

A flower fringed grass walk is always a pleasant feature, but such a walk must be laid with care. Unlike gravel walks, which should have a concave surface, grass walks and steps must be level, and this means perfect drainage—a most important item, for if badly drained a walk of this kind would be a source of inconvenience after heavy rains. On sloping ground terraces are necessary. They require the same care that one would devote to a well kept lawn, but no more, once the effect is secured.

There are few steps of this kind in America, but they abound in English gardens. There is no reason why they would not remain green throughout the entire year in some sections of this country, and they can be easily substituted for the unsightly stone steps or ragged dirt steps which are common.

### LIGHTING YARDS ADDS TO THE BEAUTY OF SUBURBS

Illuminating Conveniences For the  
Home Should Be Picturesque.

The use of kerosene, gasoline, home-made electricity and acetylene gas are being carefully tested on many farms and suburban estates, out of reach of public service corporations, for supplying lights. The common use of gasoline generators, which have now reached a high state of perfection, has brought them into prominence for outdoor lighting, as well as providing brilliant lights for the house and for cooking purposes. Gasoline lamps for the entrance gate posts, for lanterns set permanently on stable walls and for use within the stables and dairy barns may be enjoyed at little cost when one of these practical gasoline gas generators has been established for illuminating the home and the grounds. Without this plant for general use the plainest types of gasoline lamps, filled and lighted the same as coal oil lamps, may serve as the source of dependable lights for yards and stables.

Many practical and enterprising farmers who are blessed with streams on the home grounds that can be harnessed for the development of power are experimenting with homemade electricity with very satisfactory results. By damming up the stream for satisfactory water power an inexpensive electrical plant may be thoroughly practical wherever there is a stream of water of sufficient size and fall to turn a water wheel. One of the most interesting features in establishing this form of home illumination is the fact that the turbine used to furnish light will also provide power to run various sorts of farm machinery, including the feed mills, the wood saws, corn shellers, etc.

The subject of providing inexpensive and picturesque lanterns for yards and stables, however, need not depend upon the installation of extensive plants, or even the simplest of apparatus for homemade gas and electricity. The cheapest form of steady burning kerosene lamp, set within a lantern of good type, and with a good reflector, is within the reach of every farm owner and renter.

A picturesque setting will cost no more than a lantern position carelessly selected. An ugly post set close beside the driveway, at a dark turn in the garden leading to carriage sheds and stables, will doubtless give just as satisfactory results in the mere form of illuminating as the one set within a clump of flowering shrubs, or evergreen hedges, or dwarf spruces, but there will be no comparison in the decorative value.

### BOYS AND GIRLS LEND HELP IN BEAUTIFYING CLEVELAND

Gardens Cared For by Boys and Girls  
Decrease Disease and Crime.

Fully 5,000 public school children of Cleveland, O., gave their help in the city beautiful movement there according to the school director. Under their system it is possible to show in definite terms the results obtained by the young gardeners, the efficiency of the work done, the results obtained and the amount of good accomplished. Statistics and data have been collected showing the decrease in flies and disease where gardens are planted and the decrease in the number of juvenile offenders in neighborhoods well sprinkled with gardens.

Both the boys and girls take an active interest in these gardens and immediately after school is out in the afternoons the children gather for work. In Cleveland a temporary building was erected for the storing of the tools. Every Saturday morning during the summer the gardeners hold a flower and vegetable market when they sell their produce. The flowers and vegetables grown are the property of

the children, and they may either sell them or take them home. Records are kept of skill in planting, cultivation, weeding and products. Courses in nature study regarding life processes of plants, insect pests and how to combat them, plant diseases and how to combat them are given in Cleveland and make the garden work of real value to the children.

The large gardens are radiating centers for the neighborhoods in which they are located. They make possible greater efficiency, intelligence and science in the home gardens.

Interest in garden work is cumulative. When the children are properly directed their ambition is stimulated, and year after year they will extend their activities and acquire greater success.

### Beautify Your Back Yard.

It is a shame that the words "back yard" should so often call up a dismal picture of dilapidated fence, coal ashes, old furniture and garbage tins. Begin now to interest yourself and your children in the improvement of your back yard. Spend a dollar on tools and the same on flower seeds and make pleasant, healthful occupation for many summer hours. There are a number of hardy annuals that flower profusely and require no scientific care to give good results. Perennials sown at the proper time will give cut flowers every year after the first. It may be pleasant next July or August to sleep in your back yard than in your house under these conditions; also you will find that if the people living in a block get interested in gardening they will not tolerate a lot of useless cats and dogs about, whereby the peace of the neighborhood may be enhanced.

"Who loves a garden still his Eden keeps."—Texas Farm and Ranch.

### Uses of Lime.

Lime is seldom if ever applied to soils by reason of its value as a direct fertilizer. Its chief value lies in its unlocking, unavailable nitrogen, phosphoric acid and potash. We usually apply it to gardens in one of three forms—viz, quicklime, gypsum or land plaster and wood ashes. We would not advise applying it in any form to soil for lawn purposes. Better far to use it on the grass when it shows need of food. It is very beneficial to Kentucky blue grass.

### Climbing Nasturtiums.

Climbing nasturtiums can be combined with those of dwarf habit. Two climbing plants at each of the two corners of the box nearest the window can be trained over a cord or a trellis made of wood which follows the outline of the window frame. It is not well to train any plant on wire, as the wire heats quickly in hot sun, burns the stems twisted about it and ultimately causes the death of the plant.

# THE REASON WHY

The continued run of Job Printing at the Current office has led to the question of WHY? It is because

## The Current

Is equipped with the latest as well as the best type and accurate reliable printers and can and

## DOES BEST JOB PRINTING

Having a larger stock of paper to select from than any other establishment in the Pecos Valley and

## Is Because

Of the fact that all work is absolutely guaranteed in press work and is printed on the best

## Of Best Presses

The Chandler & Price Gordons, and having the best workmen and the only

## Standard Linotype

In Eddy County naturally prints more local news, more general reading and more state news than any other medium

## 30 Years Experience

The Current will be sent to any address for one year for \$1.50. Subscribers who have taken the Current for twenty years are the ones who pay most promptly.
